Frequency mode: Frequency difference range: 0-99.9995MHz 20. Frequency mode: Edit/Save channel specs 21. 256 memory channels 22. Emergency 23. Frequency scan 24. DTMF -1-

Frequency scan Scan other radios' CTCSS/DCS and frequency to make

After defining the side key function as a frequency scan function, turn it on through the side key. This function can scan the frequency of U/V/200M/350M, and switch the frequency band to be scanned by the [P1] key. After scanning the frequency, it will continue to scan CTCSS/DCS. If there is no CTCSS/DCS, the screen will display 'NONE' and end the scan. At this time, the scanned data can be saved to the designated channel

be launched. Or through [▲] or [▶] to start the next frequency scan.DTMF A. DTMF encode Quick transmitting Encode: In transmitting status, press digit keys, [♣] *, # to transmit DTMF encode 0-9,

ABCD*#. Press key to continuously encode transmitting and release to end encode transmitting. Transmitting encode after editing: In standby mode, press [#] key to enter DTMF edit menu, input 0-9,ABCD*#, if less 6 digits then press [#] as ending. Done editing, press

PTT to transmitting DTMF. In edit mode press [3] to Enter Menu, then select option in menu list

[] Long press to quickly change menu option, in Scan mode, change scan direction [■] Long press to quickly change menu option, in Scan

mode, change scan direction [] In the input state, clear the information that has been

Numeric keypad Input information while in programming menu or input non-standard CTCSS/DCS if need[■]key

Short Press: Switch Reverse Frequency / Talk around /Normal mode

Long press(Over 2 seconds): Active frequency/channel Short press: DTMF edit. Use * key to end if less then 6

In FM mode, scan FM Long press: Lock/unlock keypad

Long press to enter this function, short press to exit this function

25. GPS (optional) B. DTMF Decode 26. Boot interface customization 27. PC Programming ANI Name Display 28. Wireless programming via Bluetooth(optional) To indicator which radio is transmitting. 60 group names can be selected. P1 P2 50 groups name are radio 1 to radio 50. The rest of 10 group names can be edited via programming software. GPS function Press [] or [] to enter the GPS positioning interface. 1!< 2 ABC 3 DEF ** At the same time, you can switch the coordinate display mode and the image mode. It also has the backtracking 7 PORS 8 TUV 9 WXYZ # 塩 function. You can store the starting point position in advance, and you can view the direction and distance to the current position in real time to ensure that you won't **Keypad description**1. Keypad function get lost in the wild. Short press: Switch A/B band Wireless programming via Bluetooth Long press: In channel mode, switch channel display mode Short press: Switch frequency mode and channel mode Long press: Turn on/off ANI name display function Functional keypad

Menu operation 1) Press , then enter menu via up/down key. 2) Press again to enter the menu function 3) Select option via up/down key. 4) Press to confirm and back to main menu

5) Press to exit menu and back to normal working mode. Note: Step, TX power, W/N band, CTCSS/DCS, frequency different etc. only set valid in frequency mode. Other function description

1. Dual PTT Set side key2 as PTT-B, press PTT to transmit A band, press PTT-B to transmit B band.

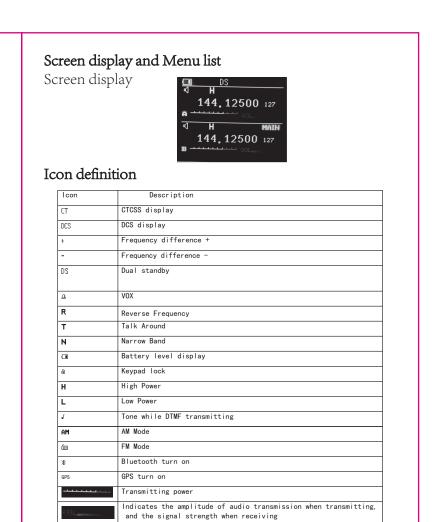

2. AM Mode 108-136Mhz, AM mode receiving 3. Scan mode

TO/CO/SE Mode

TO: Time scanning, the walkie-talkie pauses scanning when it detects a signal, and after staying stopped for about 5 seconds, the walkie-talkie will continue scanning even if the signal is still there.

CO: Carrier scanning, the two-way radio pauses scanning when a channel is detected and keeps it on the same frequency until the signal disappears. There is a 2 second delay between the disappearance of the signal and the resumption of scanning to allow time for the response to
